

Hannah Bryant
Branch Manager - Bromley

Meet Hannah, your Branch Manager for Bromley

About me

Hi, I'm Hannah. As the Bromley manager, I have a strong duty of care to my customers and my carers in equal measure and strive to provide care based not only on what is needed but what is wanted by each customer on an individual basis. I've worked in care for over seven years now, and having spent the last two and a half years working in Birmingham, I'm now back home in Bromley!

My experience and expertise

I first started working in care as a respite carer supporting young children and I've not looked back since!

I then progressed into working in complex care and moved into adult services, working my way up through roles including a team leader, care co-ordinator, deputy manager and now manager. I am working at completing my Level 4 in Health and Social Care to support the work that I am doing.

I work very hard within my role to do my utmost to support everyone that I work with and enjoy working as part of a larger team to come together to provide the best care possible. When a customer is happy with the service we are providing and a carer feels supported to do the best job they can, then I'm a happy manager.

Why I chose Helping Hands

I decided to join Helping Hands based on the dedication to high standards of care and the outstanding reviews from both customers and carers, detailing the quality and consistency of support that is given by the company. Carers have the opportunity to impact on lives on a daily basis and alongside management we, as a team, are able to make noticeable differences to the lives of our customers.
